Accessible Web Providers Directory

The Accessible Web Provider's Directory is not an endorsement of any one provider but rather a compilation of companies and private contractors who have requested inclusion in this directory and who have identified their individual web accessibility skill sets and expertise.

If you would like to be included in this directory, please visit http://www.surveymonkey.com/s/MDTAP to complete the survey.

Eduardo Meza-Etienne
TecAccess
2410 Granite Ridge Road, Building A, Unit 1
Rockville, VA 23146
USA
emeza@TecAccess.net
(804) 749-8646
www.tecaccess.net
TecAccess ensures that your organization is aware of -- and prepared for - mounting changes in accessibility and disability guidelines that impact your human resources, IT, business development teams, marketing, and risk management departments. We prepare you to address WCAG 2.0, the pending Section 508 Refresh, the recent amendments to the Americans with Disabilities Act (ADAAA), and the UN Convention on the Rights of Persons with Disabilities.
Project Size: TecAccess is proud to serve government agencies from around the world, educational institutions, and small, medium, and large size corporations.

www.saic.com
As a web developer and a contractor, I've been working in a federal government environment for about 12 years. Ever since Section 508 became effective in 2001, I've been responsible for making all my development tasks 508 compliant. I take 508 seriously not just because of the legal obligation, but because of the moral obligation. People with disabilities must not be ignored.

www.testpartners.co.uk, www.testpartners.co.uk/accessibility_consultancy.htm.
We have conducted hundreds of accessibility projects since 2002, and have services for every stage of development from initial concept through wireframes and page templates to the final build and ongoing maintenance. In addition to the WCAG testing, we also conduct user testing with disabled participants and assistive. Our experience is predominantly with the WCAG but we have tested some websites for compliance with Section 508.
The majority of our projects are under $10k and we are interested in projects from under $1k up to $300k. We are based in the UK but provide a 24/7 service to support a global customer base.

Richard Donley Fox
815 North Third Avenue, Apartment #220
Phoenix, Arizona 85003
United States
rdf@richardfox.com
(602) 253-5020
http://www.richardfox.com
I have worked on a lot of different web development projects in the past thirteen years. Most of the top politicians in the state have hired me to work for them at one time or another. But, the most satisfying of all the projects I have worked on are ones for my disability clients. Nothing could be more satisfying than to work on a project that may help someone with disabilities face some of their personal challenges and make their path just a little bit easier.
Project size: I have no limitations. I have worked on sites with thousands of pages, with no problem. I am a single-person operation. I have no car, live right downtown in Phoenix and spend most of my waking hours in front of my computer.
Specializations: HTML, PDF
